Raj,
We had a conference call this morning. It was agreed that you should work on this.
Please let me know what funding you will need.

Good Morning Jack,

At this point we are only aware of detecting MCHM in water/soil by semivolatile GC/MS (8270). I've talked to Restek about getting the standards in air but they don't have them.

Ex. 5 - Deliberative

Ex. 5 - Deliberative

As Cindy mentioned before, we took an air sample in one of our receiving lab where MCHM was briefly stored but the instrument did not detect any MCHM (there was only a very faint trace of licorice smell when the air sample was taken; therefore nothing much could be deducted from that quick experiment).

We'll continue to stay in touch with Restek on this subject matter and inform Cindy of any development.

Thanks, Cindy. Will wait to hear back from Hoang.

Dennis, I was with Dave Mickunas two weeks ago in South Philly at Ruth's VI site. I thinknot sure....he is with "his" TAGA bus is in Arizona or New York.....and I don't know the status of the other two (I think one is being repaired).

If you think we should try to get him there.....assuming he could do this..... we'll likely need to ask Fran or Dave to make a request to ERT's Harry Compton.....

We can talk if you want.... call anytime.
